## BACKGROUND

### THE IMPACT OF INFLUENZA

- Worldwide there are an estimated 250 000 500 000 deaths annually influenza 1, 4
- In Australia influenza causes 3500 deaths, 18 000 hospitalisation & 300 000 GP visits annually 2
- o Populations with risk factors for complications, death and hositalisation 2, 3
  - Pregnant women
  - Young children and babies less than 2 years of age
  - Adults 65 years of age and older
  - People with chronic medical conditions i.e. asthma, chronic respiratory disease, cardiac disease, neurological disease, kidney disease, liver disorders, impaired immune system such as HIV, asplenia or cancer, haematology conditions
  - Indigenous populations
- o In addition, 1.5 million work days are lost annually in Australia 2, 5

# INTRODUCTION

### INCREASING INFLUENZA VACCINATIONS TO AT RISK AND MARGINALISED POPULATIONS

- Monash Health provides healthcare to one quarter of Melbourne's population.
   across the entire life-span from newborns and children, to adults, the elderly, their families and carers
- Monash Health received pilot funding by South Eastern Primary Health Network
- Primary Health Networks, established by the Department of Health to increase efficiency and effectiveness of medical services, particularly for those at risk of poor health outcomes
- Monash Immunisation was tasked to deliver a mobile, nurse led immunisation platform to vulnerable groups
- The non traditional model of care used in this pilot accessed the patients within their own environment they
  did not have to access formal medical services. Intentionally tried to access people who would not normally
  seek medical attention

### **METHODS**

### INFORMATION GATHERING

- A focus group was established to characterise the target populations of at risk individuals
- Collaborations and connections were established with identified sites
- o 4 main areas of focus:
  - ATSI
  - Elderly
  - Refugee and Non English speaking groups
  - Homeless
- 21 identified sites, with a varied number visits to individual sites over a 4 month period
- A timetable for delivery was established

# METHODS

- For staff safety, no parks or on the streets
- Advertising was sent to all the sites each site was able to customise this to suit their individual needs
- Visits commenced in April though to August, 2017
- Data was collected on recipients at the time of vaccination and from each site after the visit
- o All vaccines given were recorded on the Australian Immunisation Register and local government software ImPS

# SITES IDENTIFIED

- o The identified vulnerable sites within the Monash Health catchment included:
  - Refugee/Asylum Support Centres
  - Aged Care Services
  - Crisis Housing
  - ATSI Support Facilities
  - Women's Refuges
  - Diabetes Clinics
  - Chronic Disease Management Clinics
  - Antenatal Gestational Diabetes (GDM) Clinics
  - Drop-in Centres

### CLIENTS WHO HAVE EVER HAD A FLU VACCINE PREVIOUSLY

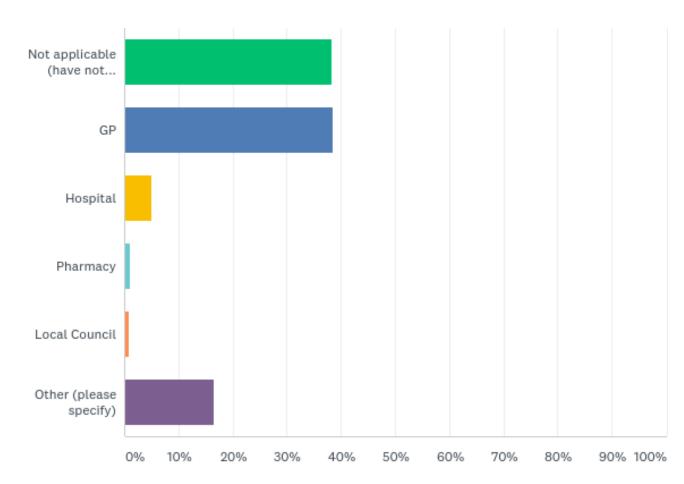

### CLIENTS WHO HAD A FLU VACCINE LAST YEAR

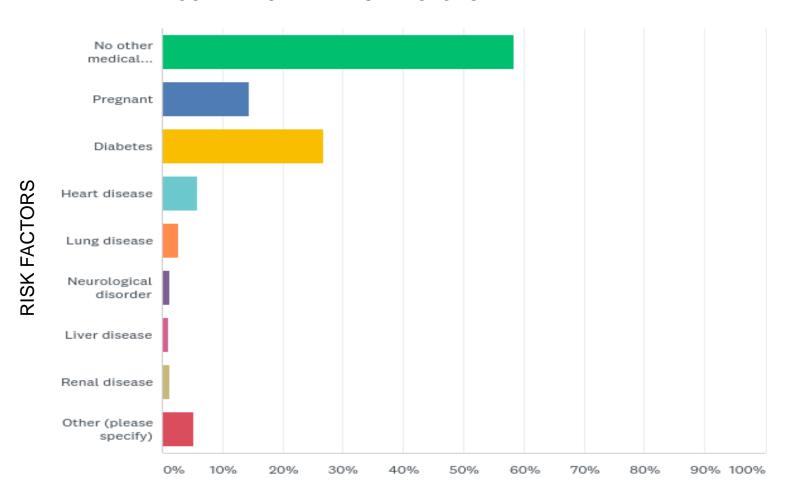

### PLACE PREVIOUS FLU VACCINES WERE GIVEN

### VACCINE RECIPIENT RISK FACTORS

# RESULTS SUMMARY

### **OUTCOMES**

- 520 vaccinations were delivered
- 37% of the population reached had never had a flu vaccine previously
- o 57% hadn't had a flu vaccine the year before
- 58% of the population reached had at least one medical risk factor for severe influenza

# SITE EVALUATION DATA

#### POST-SESSION EVALUATION

PLEASE RATE ON A SCALE OF 1 TO 5 THE FOLLOWING:

a. the communication and organization by the team **prior** to the session

1	2	3	4	5
Extremely Dissatisfied	Dissatisfied	Neutral	Satisfied	Extremely Satisfied

 the communication and organization by the team on the day of the session

1	2	3	4	5
Extremely	Dissatisfied	Neutral	Satisfied	Extremely
Dissatisfied				Satisfied

 the level of professionalism, including sensitivity to your client's needs, on the day of the session

1	2	3	4	5
Extremely Dissatisfied	Dissatisfied	Neutral	Satisfied	Extremely Satisfied

DO YOU BELIEVE THIS INITIATIVE IS OF VALUE TO YOUR CLIENTS?

Yes No Undecided

In your opinion, what proportion of your clients would not have been vaccinated without this program?

Would you be interested in having a mobile influenza vaccine service come out again next year?

Yes No Undecided

WOULD YOU LIKE MORE, LESS OR THE SAME NUMBER OF VISITS?

More Less Same

Do you have any suggestions of ways to improve the service for future years?

- o Of the 16 sites visited by Monash Immunisation:
  - 15 of the 16 sites would like us to return again next year
  - 13 sites felt this initiative was of value to their clients
  - 6 sites would like more visits in the future
  - 2 sites would prefer less visits
  - 8 sites would like to repeat the service without changes
  - The sites rated the communication, professionalism and organisation 4.4-4.7 / 5

### CONCLUSION

### Overall a successful pilot program

### Strengths

- Number of vaccinations given
- o Increased awareness and education of influenza vaccinations amongst vulnerable groups

### **Lessons Learnt**

- Aged care population
- Capturing ATSI population

### **New Connections**

- Migrant English language schools
- o Mobile Washing Van homeless

### Potential Future Opportunities

- Other populations
  - Paediatric Clinics (spina bifida, CF, asthma)
  - Sleep Schools
  - Drug Injecting Population
  - Extend Geographical Area
- Other Vaccinations
  - Boostrix, Hepatitis B
